DHANSURRYA SP

Front End Developer

Experienced frontend developer skilled at creating responsive and user-friendly web applications. Proficient in HTML, CSS, JavaScript, and React.js. Converts design mockups into pixel-perfect, interactive interfaces that work across multiple browsers. Strong understanding of web development best practices, version control, and debugging. Collaborative team player dedicated to staying current on emerging technologies that improve user experiences

Work Experience

Front End Developer - HTML Kitchen Pvt

May 2022 - Present

- Developed and maintained front-end components. Enforced best practices in coding, user interface design, and performance optimisation.
- Collaborated closely with designers, backend developers, and project managers to translate project requirements into usable interfaces.
- Implemented solutions to increase website usability, performance, and accessibility.
- I successfully managed multiple projects at the same time, prioritising tasks and meeting project deadlines.

Projects

LAVOS

- Lavos marks my debut project in web development.
- Lavos Innerwear Company aimed to create an online presence for a new innerwear brand designed to target to modern consumers looking for both comfort and style.
- I designed and coded the About Us page, Contact page, and product categories section for the Lavos Innerwear Company website, ensuring seamless integration with the overall site design and responsiveness across multiple devices.

M2N Stationary & Craft Suppliers

- M2N Stationery & Craft Suppliers is a growing company that specialises in the retail of stationery and craft supplies.
- In the project, I headed the development of the entire single-page website for M2N Stationery & Craft Suppliers.

BLUE AQUA LIFE

- BLUE AQUA LIFE involves providing expert advice and support to individuals, businesses, and organizations involved in the aquaculture industry
- Developed the BLUE AQUA LIFE website, which implemented PHP to convert designs into functional WordPress pages, improving the site's scalability and manageability.
